

BIBEK BHANDARI

SQL / Database Developer | Backend Developer | Healthcare Software (HMIS)

Kathmandu, Nepal | +977 9819033012 | bhandaribibek27@gmail.com | <https://github.com/bibekb12> | <https://www.linkedin.com/in/bibekb12> | www.bibekbhandari.com.np

PROFESSIONAL SUMMARY

SQL and Database Developer with hands-on experience developing and optimizing reporting queries across Microsoft SQL Server, PostgreSQL, MySQL, and Oracle within healthcare information systems. Practical experience building DHIS2 and HMIS reporting solutions. Backend development experience with Python, Django, Django REST Framework, and C#/.NET, including REST API development and integration of stored procedures with application logic. Comfortable working independently on medium-complexity SQL, reporting, and backend tasks within live production healthcare systems, and looking to grow into broader database and backend development responsibilities.

TECHNICAL SKILLS

Database & SQL: SQL, MySQL, PostgreSQL, Microsoft SQL Server, Oracle, Query Optimization, Stored Procedures, SQL Reporting, Complex Joins, CTEs,, Aggregations, Window Functions, Database-Driven Reporting, Data Extraction, Data Aggregation

Backend Development: Python, Django, Django REST Framework, C#, .NET, REST APIs, Internal APIs, Database Integration

Healthcare / Information Systems: DHIS2, HMIS, OpenMRS, Bahmni, Healthcare Reporting, Healthcare Information Systems, Hospital Management System

Frontend: HTML, CSS, JavaScript, Bootstrap

Tools & DevOps: Git, GitHub, GitLab, Bitbucket, Docker, DBeaver, MySQL Workbench, Visual Studio Code

Project / Collaboration Tools: Jira, Asana, Trello

PROFESSIONAL EXPERIENCE

Database Associate (Contract) — Nyaya Health Nepal(NGO), Kathmandu, Nepal *Feb 2026 – Sep 2026*

- Develop and optimize SQL queries for DHIS2 and HMIS reporting across healthcare information systems.
- Work with OpenMRS/Bahmni healthcare data, including an OBS table containing over 60 million records.
- Build reporting queries using joins, CTEs, views, aggregations, and selected window functions.
- Analyze and optimize medium-complexity SQL queries to improve reporting performance and maintainability.
- Extract, transform, aggregate, and validate healthcare data to support reporting requirements.
- Troubleshoot SQL and reporting issues across healthcare data workflows.

SQL Developer (Full Time) — Medipro Computers Pvt. Ltd., Kathmandu, Nepal *Jan 2025 – Feb 2026*

- Developed SQL queries and reporting solutions using Microsoft SQL Server for DHIS2 and business reporting requirements.
- Developed and integrated stored procedures with .NET applications to support application workflows on HMIS and Pharmacy, Inventory, Account and database-side business logic.
- Optimized SQL queries to improve execution efficiency and reporting performance.
- Worked with medium-complexity reporting queries involving joins, aggregations, filtering, and relational data.
- Investigated and resolved SQL and reporting issues across application and database layers.

Software Developer Intern — Meraki Tech Pvt. Ltd., Kathmandu, Nepal *Jan 2025 – May 2025*

- Developed backend functionality for an HMIS application using Django, Django REST Framework, and PostgreSQL.
- Developed internal REST APIs to support healthcare application workflows and data exchange.
- Implemented backend functionality for saving laboratory records and supporting pharmacy and hospital billing workflows.
- Worked on accounting workflows, including ledger posting and account posting.
- Contributed to the Lab, Pharmacy, Billing, and Account modules of the application.
- Debugged and resolved backend issues across healthcare application modules.

Implementation Officer (Full Time) — Midas Technologies Pvt. Ltd., Kathmandu, Nepal *Dec 2021 – Dec 2024*

- Implemented a healthcare software suite covering Billing, Pharmacy, Inventory, Laboratory, and Accounting across different hospitals and their branches.
- Supported software deployment, configuration, troubleshooting, and user adoption across hospital environments.

- Worked with Oracle database installation and supported database-related implementation activities.
- Supported integration between Billing and Accounting modules and between Pharmacy and Accounting workflows.
- Supported HMIS-to-DHIS2 integration for healthcare reporting and data exchange.
- Gained practical exposure to hospital workflows across billing, pharmacy, laboratory, inventory, and accounting modules.
- Worked directly with users and technical teams to troubleshoot application and workflow issues.

PROJECTS

Healthcare Reporting & SQL Optimization (Professional Experience — Nyaya Health Nepal)

Technologies: SQL, OpenMRS, Bahmni, DHIS2, HMIS, MySQL

Developed and optimized SQL reporting queries for DHIS2 and HMIS requirements, working directly with an OpenMRS OBS table of approximately 60 million records. Used joins, CTEs, views, aggregations, and basic window functions to build and maintain reporting queries, with a focus on improving query performance and reporting accuracy for medium-complexity healthcare reporting needs.

HMIS Backend Development (Professional Experience — Meraki Tech Pvt. Ltd., Medipro Computers)

Technologies: Python, Django, Django REST Framework, PostgreSQL, REST APIs

Contributed to backend development for a hospital management application, building internal REST APIs and supporting workflows for laboratory record management, pharmacy billing, hospital billing, and ledger/account posting. Worked across the Lab, Pharmacy, Billing, and Account modules alongside a PostgreSQL database.

EDUCATION

Bachelor of Computer Application (BCA) (2022 - 2027(Expected))

Danfe College, Sinamangal, Kathmandu, Nepal
